About Me

Software Engineer with over 2 years of experience, specialized in Java and knowledgeable in TypeScript, Node.js, SQL, Docker, and other technologies. I have participated in projects developing microservices-based applications, applying design patterns, agile methodologies, and clean code best practices.

I am characterized by strong problem-solving skills, analytical thinking, organizational abilities, and a commitment to continuous learning.

Formación

Preparing for Oracle Certified Professional: Java SE 21 Developer

Bachelor's Degree in Computer Engineering - Software Engineering
University of Seville
2019 - 2023

Personal Projects

- **FoodCheck**
  - Python · Django   view
- **Dwarf**
  - Java · Spring · JSP   view
- **Gus Gus**
  - Unity · C#   view
- **Static**
  - Godot · GDScript   view

Language & Other

- English - B1
- Driver's license Class B
- Own vehicle

Experience

Full-Stack Developer   *09/11/2023 - Present*
Grupo Solutia

Key Projects: Vacunas (SAS) and Mapfre
- Fullstack development and maintenance in Java (11 → 21), TypeScript, JSF, Spring, and PostgreSQL.
- Contributed on microservices migration and application of Domain-Driven Design (DDD).
- Implementation of features, issue resolution, and ticket management under Scrum/Kanban.
- Experience in both legacy and modern environments, from Weblogic + JSF to Vite + Web Components.
- Collaboration in analysis, database modeling, and architecture improvement for scalable solutions.
- Continuous learning in design patterns, Docker, Helm, and modern architectures.

Technologies & Tools:
Java · Spring · Oracle · PostgreSQL · TypeScript · Docker · Lit · JSF

Intern Programmer   *02/03/2023 - 01/07/2023*
NTT DATA

Assisted in performing the following functions:
- Development and support for proprietary processes for creating analytical models.
- Development and support for data integration.
- Implementation of visualizations to enable data analysis.

Technologies and Tools:
Oracle · Pentaho (PDI) · Visual Studio · JavaScript · Python

Skills

Programming Languages
- Java (Advanced)
- TypeScript (Intermediate)
- JavaScript (Basic)
- Python (Basic)
- C# (Intermediate)
- GDScript (Basic)

Databases
- SQL (Advanced)
- PostgreSQL (Basic)
- Oracle (Basic)
- MongoDB (Basic)

Architecture & Development Style
- Microservices (Intermediate)
- Domain-Driven Design (Basic)
- SOLID & Design Patterns (Intermediate)

DevOps / Cloud / Containers
- Docker (Intermediate)
- AWS (Basic)
- Git (Basic)

Backend / Frameworks
- Spring Boot (Advanced)
- Node.js (Intermediate)

Frontend / UI
- Lit + Vite (Basic)
- JSF (Intermediate)
